Bookkeeping is an essential part of running any business. It helps the business owner prepare accurate financial records, keep track of cash flow, and helps you to plan for the future.

It is important not to confuse bookkeeping with accounting, which is quite a different field.

✓ Marketing

We can provide you with ongoing marketing support. This is bespoke to every client, and your Designated Marketing Manager can discuss this with you, establishing which areas would be best to focus on for you and your practice. This may include, developing your marketing strategy to include blogs, social media, referral management, patient journey planning, Google advertising, SEO Booster package, or helping you with establishing good working relationships with patient liaisons, support applying for PMI recognition, or developing relationships and opportunities with charities – all of which we can deliver for you and much more.

Our hourly rate is £65 an hour, and our minimum hours are 5 per month. Most of our clients do require more support than this – but that is for you and your Designated Marketing Manager to discuss.

✓ Personal PA

Many of our medical clients have realised the benefit of a personal PA to help with their busy lives outside of their private practice. They can support you with such tasks as:
